

Subtraction

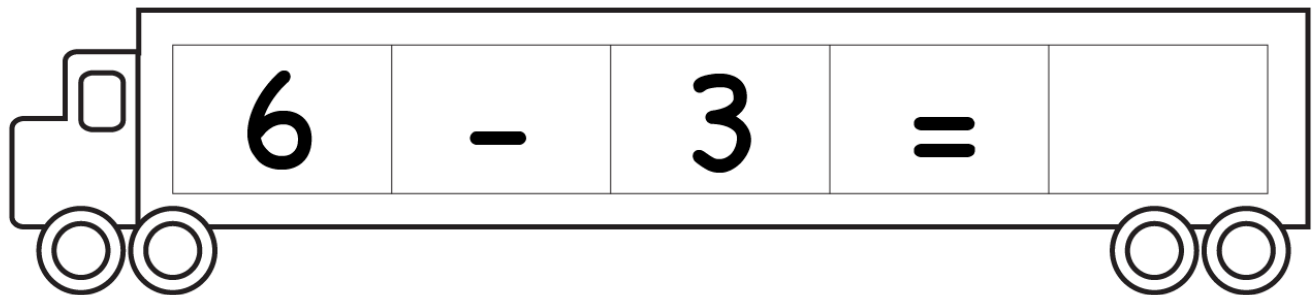

8 - 2 =

A truck-shaped box with a cab on the left and two wheels on the right. The main body is divided into five equal-width sections. The first section contains the number 8, the second contains a minus sign, the third contains the number 2, the fourth contains an equals sign, and the fifth is empty for the answer.

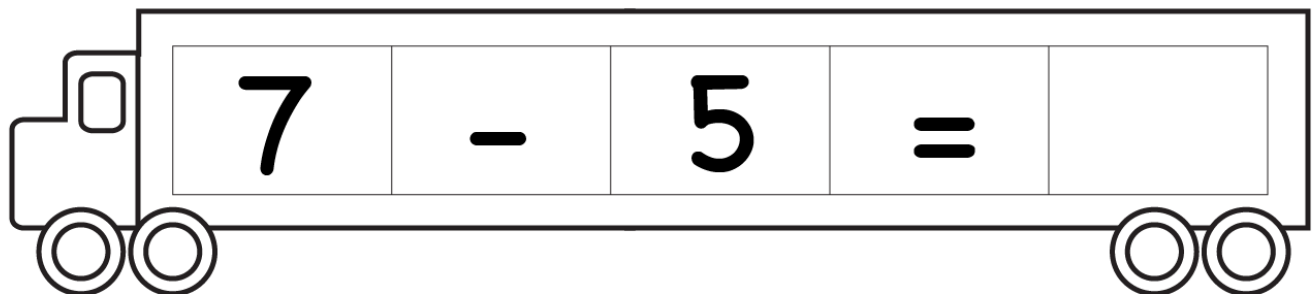

9 - 5 =

A truck-shaped box with a cab on the left and two wheels on the right. The main body is divided into five equal-width sections. The first section contains the number 9, the second contains a minus sign, the third contains the number 5, the fourth contains an equals sign, and the fifth is empty for the answer.

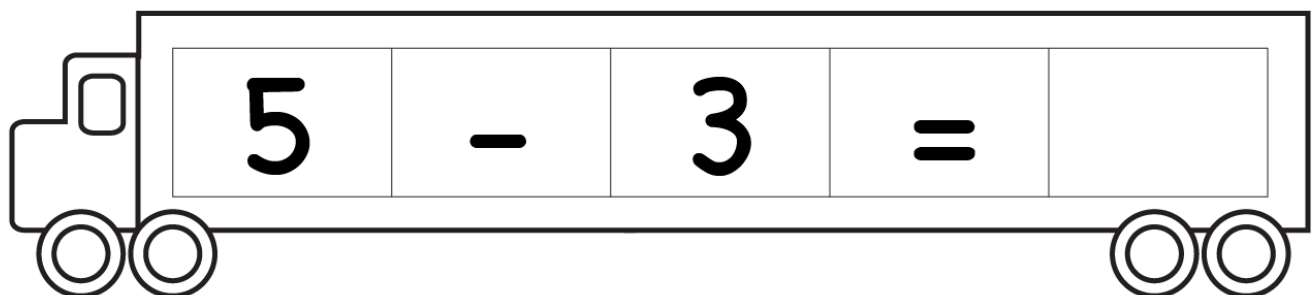

6 - 3 =

A truck-shaped box with a cab on the left and two wheels on the right. The main body is divided into five equal-width sections. The first section contains the number 6, the second contains a minus sign, the third contains the number 3, the fourth contains an equals sign, and the fifth is empty for the answer.

7 - 5 =

A truck-shaped box with a cab on the left and two wheels on the right. The main body is divided into five equal-width sections. The first section contains the number 7, the second contains a minus sign, the third contains the number 5, the fourth contains an equals sign, and the fifth is empty for the answer.

5 - 3 =

A truck-shaped box with a cab on the left and two wheels on the right. The main body is divided into five equal-width sections. The first section contains the number 5, the second contains a minus sign, the third contains the number 3, the fourth contains an equals sign, and the fifth is empty for the answer.
