

Addition

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $2+8=$ and the right section is an empty box for the answer.

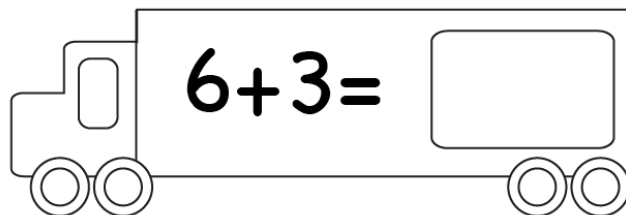

$2+8=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $3+5=$ and the right section is an empty box for the answer.

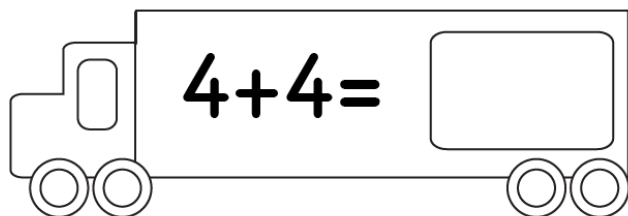

$3+5=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $7+2=$ and the right section is an empty box for the answer.

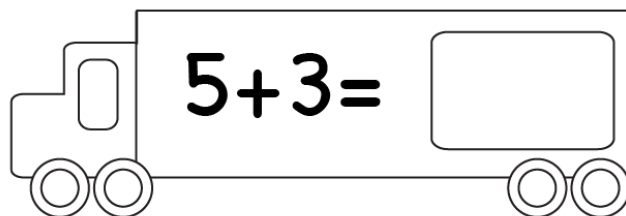

$7+2=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $6+3=$ and the right section is an empty box for the answer.

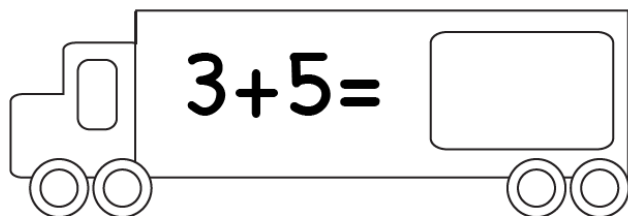

$6+3=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $4+4=$ and the right section is an empty box for the answer.

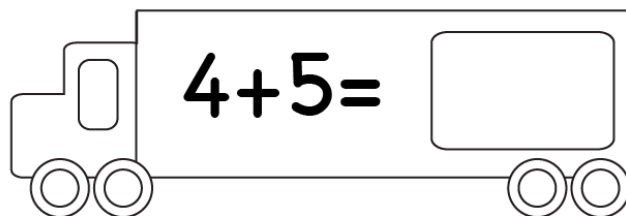

$4+4=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $5+3=$ and the right section is an empty box for the answer.

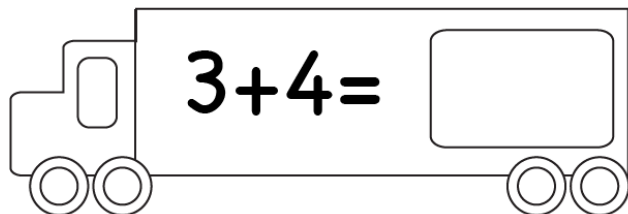

$5+3=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $3+5=$ and the right section is an empty box for the answer.

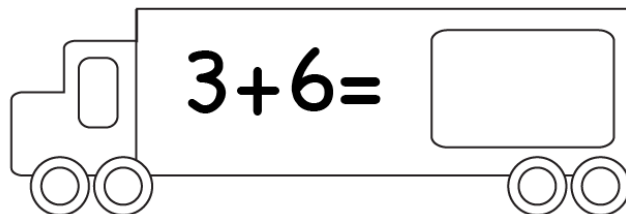

$3+5=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $4+5=$ and the right section is an empty box for the answer.

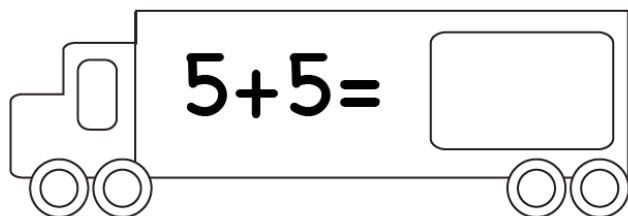

$4+5=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $3+4=$ and the right section is an empty box for the answer.

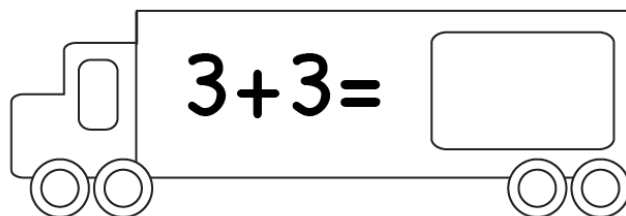

$3+4=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $3+6=$ and the right section is an empty box for the answer.

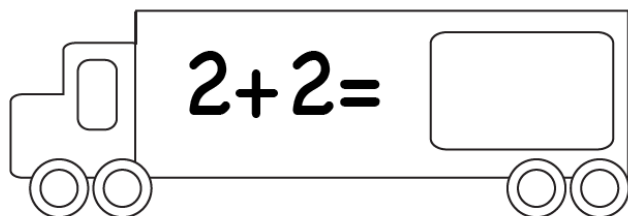

$3+6=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $5+5=$ and the right section is an empty box for the answer.

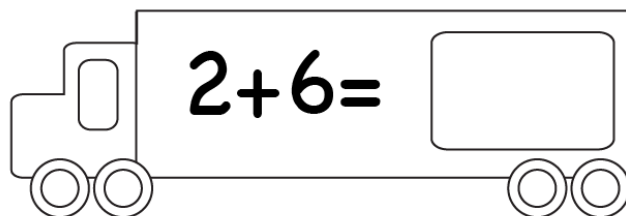

$5+5=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $3+3=$ and the right section is an empty box for the answer.

$3+3=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $2+2=$ and the right section is an empty box for the answer.

$2+2=$

A truck-shaped box with a cab on the left and two wheels on the right. The box is divided into two sections: the left section contains the equation $2+6=$ and the right section is an empty box for the answer.

$2+6=$
